

Hypothesis Testing: Impact of Vehicle Class on EPS

Insights Summary:

1. EPS by vehicle class shows variability across different classes, with noticeable changes between 2019 and 2023.
2. Total net revenue by vehicle class highlights which classes are driving revenue.
3. Seat occupancy has varied between 2019 and 2023, affecting overall revenue.
4. Refunds significantly impact net revenue in some vehicle classes.
5. EPS growth from 2019 to 2023 shows certain classes have improved while others may have declined.
6. Average trip duration by vehicle class indicates which classes might be preferred for longer or shorter trips.
7. Seat usage efficiency (EPS per seat) varies, indicating potential for optimizing seat allocation.
8. The top 3 vehicle classes for EPS in 2023 provide a benchmark for other classes.
9. Distribution of EPS by vehicle class in 2023 helps understand how EPS is spread across classes.
10. Revenue contribution by vehicle class gives insight into which classes are the most profitable.
